EXPLOSIVE DETECTION CANINE TEAMS

Leading the Industry in High Consequence Threat Protection Since 1987

With a commitment to excellence, MSA's unrivaled Windsor Teams keep millions of people safe across the globe each day.

WINDSOR PROGRAM DISTINCTIONS

BEST POLICIES & PRACTICES

- **Explosive Testing & Training:** Windsor Canines are imprinted to detect all five classes of military-grade explosives and homemade explosives (HMEs). These include peroxide-based HMEs, TATP and HMTD, used extensively by terrorists.
- **Single Purpose:** All Windsor Teams are trained solely for explosive detection work to ensure peak olfactory conditioning.
- **Single Handler System:** Our Windsor Teams are based on a partnership model between one Windsor Canine and Windsor-trained Handler. The handler cares for the canine around the clock, forming a loyal bond and integrating the dog into his or her home life.
- **Handler Expertise:** Windsor Handlers possess extensive, specialized emergency response experience, typically from the bomb squad, elite tactical, and counterterrorism units, as well as elite military organizations.
- **Management Expertise:** Our management staff has over 100 years of combined canine training and deployment experience.
- **24-hour Emergency Operations Center:** Clients have around-the-clock access to our Emergency Operations Center staffed by certified Bomb Technicians, who can contact MSA management staff as required.

LICENSES & CERTIFICATIONS

DHS SAFETY Act: Our canine services are certified and thoroughly insured through the Department of Homeland Security (DHS) SAFETY Act. This provides clients with catastrophic liability protection in the event a terrorist incident occurs while MSA EDC teams are deployed.

ATF License: MSA is fully licensed to possess both high and low grade commercial and military explosives for training, testing and certifying Windsor Teams. Windsor, MSA's training site, is a Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF) licensed site. (License number ATF 6-NY-061-33-8B-00300)

DOJ NORT: We voluntarily administer the Department of Justice (DOJ) National Odor Recognition Test (NORT) to all our teams annually.

NAPWDA: MSA uses a third-party master trainer to evaluate the effectiveness of our Windsor Teams. Teams certify to North American Police Work Dog Association (NAPWDA) standards annually.

DELIVERABLES

When it comes to protecting your business from high consequence explosive threats, you can rest easy with MSA's Windsor Teams. The Windsor Canines, who are part of each Windsor Team, are specially bred and methodically trained. Each team is trained and certified annually according to NAPWDA and DOJ NORT standards. The team will be deployed with all equipment required for the fulfillment of services. MSA's 24-hour scheduling department will ensure all posts are covered and surge requirements are met. Our management team will coordinate daily, weekly, and monthly sustainment training to ensure the quality and effective operational performance of each team.

All Operatives are supported by MSA's Intelligence team. The Intel team conducts daily open source research and sends out alerts on the global threat environment to all field operatives. Operatives are updated on a near-real-time basis about events that may impact their client's security operations.

SCHEDULING MANAGEMENT

MSA utilizes a state-of-the-art technology program to facilitate the administering of field deployments. The software program, EPay, delivers schedules directly to operatives and notifies them of any changes in real time. Operatives utilize the software's mobile app to clock-in once arriving to their post, confirming location and attendance. The platform also maintains site-specific post orders, accessible to field employees at all times. All deployment activity is managed by MSA's full-time scheduling department, staffed around-the-clock. Throughout our 30 years in business, MSA has continually implemented techniques and technologies to streamline all scheduling operations, guaranteeing coverage and accountability.

COMPANY OVERVIEW

MSA Security® is the premier provider of **explosive detection services and high consequence threat protection**. MSA has divisions in Security and Investigations and is able to provide comprehensive security solutions tailored to our clients' needs. **With over 1,000 employees**, our team is comprised of active and retired members of specialized law enforcement units across the nation (e.g., Bomb Squad, Tactical, and Counterterrorism Units), as well as elite military organizations. As a result, our clients have immediate access to individuals with extensive and unrivaled experience in the areas of:

Explosive Threats

Executive Protection

Threat Intelligence Analysis

Threat Assessment and Planning

Special Event Security

Investigations

MSA has been **Leading the Industry in High Consequence Threat Protection Since 1987**. MSA's pioneering range of best-in-class security services enables us to execute situation-specific plans that protect the flow of business and keep things moving.

In 2004, MSA was one of the first four companies in the nation whose services were certified by the DHS Support Anti-Terrorism by Fostering Effective Technology (SAFETY) Act of 2002. MSA is the only one of these companies specializing in explosive detection security. This certification greatly reduces the risk of clients' excess liability in the event a terrorist attack occurs while our canine teams are deployed in the defense against, response to, or recovery from an act of terrorism.
